

Job Description - Senior Software Developer

About the Role

We are seeking a highly skilled and experienced Senior Software Developer to join our dynamic and innovative software development team. You will play a critical role in the development of our proprietary software applications. The ideal candidate will have a strong background in Microsoft technologies and a proven ability to thrive within an Agile environment.

Key Responsibilities:

- Collaborate with a small team of developers in a Rapid Application Development (RAD) environment with a strong emphasis on Agile delivery.
- Develop and maintain software for large-scale systems with long life cycles, tailored to multiple customers with varying configurations. Apply your technical expertise in ASP.NET , C# and MS SQL.
- Knowledge of the .NET Framework is expected, which is our current platform, though familiarity with .Net 6+ is a plus, which we will be transitioning to.
- Use developer tools such as Jira and GitHub.

Qualifications:

- A strong background in application software development using ASP.NET , C#, MS SQL, and the .NET Framework. Previous experience in the Food Production Sector is a plus but not mandatory.
- Proficiency with developer tools such as Jira and GitHub.
- While not essential, holding Microsoft certifications in the relevant areas would be beneficial.

About Us

Evolve 4 is a dynamic and innovative software development company delivering mission-critical software in the food production sector hosted in Azure. Our collaborative and fast-paced environment utilizes Agile methodologies to deliver cutting-edge solutions for our diverse customer base.
